Preliminary Info on **Learning4JOBS**

My Company, Spiral Media Productions, is developing a suite of Technology courses **Learning4JOBS**, graded from **Keystage 2 up to FE** students/individuals.

Having worked for many years in successful Technology business, run a Vocational College for 8 years (inside and outside state-maintained schools) and produced Learning Resources which have been critically acclaimed, we are now launching these Courses which suit the times we live in:

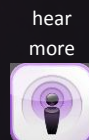

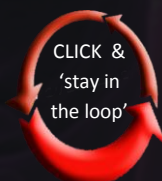

Unique features of these courses are:

- 1) They link **Vocational Learning directly to the National Curriculum.**
- 2) They are focussed on **Technology subjects** likely to be the **jobs of the near future** NOT the 'near past'.
- 3) They encourage **core skills development**
- 4) Learning includes **PBL** (practice based learning) ensuring students have the **experiential knowledge** to apply in an employment situation.
- 5) Each module from this course suite concludes with a **tangible legacy activity + hardware** which means students can continue to develop new-found skills.

This Pre-Release should be of interest to **Employers as well as Educational Establishments:**

- 6) For **Centres of Education**, **Learning4JOBS** supports your **Vocational Programmes** yet enhances **Curriculum Studies** enabling a **funding path.**
- 7) For **Employers**, **Learning4JOBS** provides an incentive to students to engage in unpaid Work Experience or Internships, because we add value via **day-release training** (JOBCENTRES - TBA)

Get in touch, give us your feedback, tell us what You would like included...
